 Water Tubes For In-ground Pool  ☐ 8ft*6 pcs☐ 8ft*10 pcs☐ 10ft*6 pcs☐ 10ft*10 pcs Made In China	Installation instructions Note: Do not fill with water before installation. - Once your in-ground pool is properly covered, insert the empty tubing into the special rings around the pool cover, laying it along the length and width of the pool/making sure the valve is facing upwards. - Fill the tubes with water using a hose to about 50%, ~75% of their full capacity. Note: Please make sure not to fill the tube completely; the water inside will expand as it freezes, so it needs some extra room inside. - Make sure the edges of the pool cover are firmly secured by the pipes so that the cover won't flutter in the wind.	 Water Tubes For In-ground Pool  ☐ 8ft*6 pcs☐ 8ft*10 pcs☐ 10ft*6 pcs☐ 10ft*10 pcs Made In China	 Customer Service: airway.com Description: water Tubes Material: 100% PVC Official Website: airway.com  Made In China MAINTENANCE - Do not use sharp objects to clean the tubes. They are about 50-75% capacity with your garden hose. Never fill them to the brim. Ice expansion will cause the seams to split. - Leak inspection: Periodically check for punctures—especially after high winds or harsh storms. Animals and children can damage the tubes.
